

Cybersecurity Maturity Model Certification (CMMC) Resources

Achieving Cybersecurity Maturity Model Certification (CMMC) is essential for Maryland Department of Defense (DoD) contractors and sub-contractors. Get advice from your APEX Accelerator Counselor on CMMC for your business. Below is a curated list of resources, including organizations offering financial assistance and support for CMMC compliance.

1. Maryland Defense Cybersecurity Assistance Program (DCAP)

- **Description:** Established in 2018, DCAP assists Maryland defense contractors with CMMC preparation, including gap analysis, System Security Plan (SSP) development, and Plan of Action and Milestones (POAM) creation.
- **Financial Assistance:** Maryland Manufacturing Extension Partnership (Maryland MEP) offers funding to qualifying Maryland manufacturers to offset costs associated with NIST 800-171/CMMC preparation and employee training.
- **Contact:** Sara Keith at skeith@mdmep.org
- **More Information:** [Maryland MEP Defense Cybersecurity Assistance Program](#)

2. Johns Hopkins University Applied Physics Laboratory (JHU APL)

- **Description:** JHU APL provides a collection of government resources related to CMMC and cybersecurity, offering guidance to contractors seeking compliance.
- **More Information:** [JHU APL CMMC Resources](#)

3. Buy Maryland Cybersecurity (BMC) Tax Credit

- **Description:** The BMC Tax Credit incentivizes Maryland companies to purchase cybersecurity technologies and services from qualified Maryland cybersecurity providers, potentially reducing the financial burden of CMMC compliance.
- **Financial Assistance:** Qualified Maryland companies may claim up to \$50,000 in tax credits annually for eligible cybersecurity purchases.
- **More Information:** [Buy Maryland Cybersecurity Tax Credit](#)

4. Defense Acquisition University (DAU)

- **Description:** DAU offers free and low-cost training modules on cybersecurity basics and compliance, tailored for DoD contractors and subcontractors.
- **More Information:** [DAU Training Resources](#)

5. Maryland Business Express – Government Contracting Resources

- **Description:** Maryland Business Express provides information on government contracting, including insights into CMMC and its implications for businesses.
- **More Information:** [Maryland Business Express – Government Contracting](#)

6. Project Spectrum

- **Description:** Project Spectrum is a Department of Defense initiative offering cybersecurity tools, training, and best practices to help small and medium-sized businesses improve their cybersecurity posture and comply with CMMC requirements. Create a free account on Project Spectrum **to perform a readiness check**. This will allow you to assess your readiness to meet the requirements.
- **More Information:** [Project Spectrum](#)

7. CMMC Information Institute

- **What It Offers:**
 - Free and affordable templates, training videos, and resources for small businesses.
- **Best For:** Subcontractors on a tight budget seeking practical and actionable training materials. More Information: <https://cmmcinfo.org/>

8. National Institute of Standards and Technology (NIST)

- **What It Offers:**
 - Free guidance on implementing **NIST SP 800-171 controls**, which are foundational to CMMC.
 - Detailed resources on cybersecurity practices.
- **Best For:** Understanding technical requirements and best practices for CMMC. More information: <https://www.nist.gov/itl/smallbusinesscyber>

Determining Required CMMC Levels:

The CMMC framework comprises three maturity levels, each corresponding to the sensitivity of information handled and the associated cybersecurity practices:

1. **Level 1 (Foundational):**
 - **Description:** Focuses on basic safeguarding of Federal Contract Information (FCI).
 - **Who Needs It:** Contractors that handle FCI but not Controlled Unclassified Information (CUI).
2. **Level 2 (Advanced):**
 - **Description:** Centers on protecting Controlled Unclassified Information (CUI).
 - **Who Needs It:** Contractors that handle CUI, requiring more stringent security measures.
3. **Level 3 (Expert):**
 - **Description:** Involves advanced cybersecurity practices for protecting CUI, including additional controls from NIST SP 800-172.

- **Who Needs It:** Contractors involved in critical national security information and operations.
- **Practices:** 110+ practices, including a subset from NIST SP 800-172.

How to Determine Your Required CMMC Level:

- **Review Contract Requirements:** Examine your current DoD contracts to identify specified CMMC levels.
- **Assess Information Handled:** Determine whether your organization processes FCI, CUI, or critical national security information.
- **Consult with DoD Representatives:** Engage with your DoD contracting officer or representative to clarify required CMMC levels based on your contractual obligations.
- **Seek Professional Guidance:** Speak to your APEX Accelerator Counselor for assistance. Consider consulting with cybersecurity experts or organizations specializing in CMMC compliance to accurately assess your required certification level.
